

Publications

Herbert Fleischner

1. Über endliche, ebene Eulersche und paare, kubische Graphen, Monatshefte f. Mathematik 74 (1970), 410-420.
2. Sätze über Eulersche Graphen mit speziellen Eigenschaften, Sätze über die Existenz von Hamiltonschen Linien, Sitzungsberichte d. Österr. Akademie d. Wissenschaften, math.-nat. Klasse, Abt. II, 178. Bd., 1.-3. Heft (1969), 77-123.
3. Über Hamiltonsche Linien im Quadrat kubischer und pseudokubischer Graphen, Mathematische Nachrichten, Bd. 49, Heft 1-6 (1971), 163-171.
4. Die Struktur der Automorphismen spezieller, endlicher, ebener, dreifach-knotenzusammenhängender Graphen, Compositio Mathematica 23, Fasc. 4 (1971), 435-444.
5. Fixpunkteigenschaften von Automorphismen spezieller, endlicher, ebener, dreifachknotenzusammenhängender Graphen, Compositio Mathematica 23, Fasc. 4 (1971), 445-452.
6. The Square of Every Nonseparable Graph is Hamiltonian, Bulletin of the American Mathematical Society (Nov. 1971), 77, No. 6, 1052-1054.
7. Hamiltonsche Linien im Quadrat brückenloser Graphen mit Artikulationen (with H.V. Kronk), Monatshefte f. Mathematik 76 (1972), 112-117.
8. Die Bestimmung der kubischen Graphen mit Hamiltonischem Quadrat, Mathematische Nachrichten 55 (1973), Heft 1-6, 213-221.
9. The Uniquely Embeddable Planar Graphs, Discrete Mathematics 4, No. 4 (April 1973), 347-358.
10. On Spanning Subgraphs of a Connected Bridgeless Graph and Their Application to DT-Graphs, Journal of Combinatorial Theory 16, No. 1 (1974), 17-28.
11. The Square of Every Two-Connected Graph is Hamiltonian, Journal of Combinatorial Theory 16, No. 1 (1974), 29-34.
12. Distribution of Points of Odd Degree of Certain Triangulations in the Plane (with P. Roy), Monatshefte f. Mathematik 78 (1974), 385-390.
13. The Importance of Being Euler, Abhandlungen a.d. Mathem. Seminar der Universität Hamburg, Bd. 42 (Nov. 1974), 90-99.
14. On Regulating Sets and the Disparity of Planar Cubic Graphs, Canad. Math. Bull. 17 (3) (1974), 367-374.
15. Outerplanar Graphs and Weak Duals (with D.P. Geller and F. Harary), Journal of the Indian Math. Soc. 38 (1974), 215-219.
16. A note on Line Colorings of Cubic Graphs, Arch. Math. (Brno) 4 (1974), 195-198.
17. Gedanken zur Vier-Farben-Vermutung, Monatshefte f. Mathematik, 79 (1975), 201-211.

18. A Necessary Condition for the Square of a Graph to be Hamiltonian (with A.M. Hobbs), *Journal of Combinatorial Theory* 19, No. 2 (Oct. 1975), 97-118.
19. Hamiltonian Total Graphs (with A.M. Hobbs), *Mathematische Nachrichten*, Bd. 68 (1975), 59-82.
20. Hamiltonsche totale Graphen von ebenen Graphen, *Mathematische Nachrichten*, Bd. 68 (1975), 83-91.
21. Hamiltonian Squares of Graphs; in: *Recent Advances in Graph Theory, Proceedings of the Symposium held in Prague, June 1974, Academia Praha 1975*, 197-206.
22. Eine gemeinsame Basis für die Theorie der Eulerschen Graphen und den Satz von Petersen, *Monatshefte f. Mathematik* 81 (1976), 267-278.
23. In the Square of Graphs, Hamiltonicity and Pancyclicity, hamiltonian Connectedness and Panconnectedness are Equivalent Concepts, *Monatshefte f. Mathematik* 82 (1976), 125-149.
24. Hamiltonian Cycles in Squares of Vertex-Unicyclic Graphs (with A.M. Hobbs), *Canad. Math. Bull.* 19 (2) (1976), 169-172.
25. On the Equivalence of Mealy-Type and Moore-Type Automata and a Relation Between Reducibility and Moore-Reducibility, *JCSS*, 14, No. 1 (1977), 1-16.
26. Value-true Walks in Finite, Connected, Valuated Graphs (with P.D. Vertergaard), *Monatshefte f. Mathematik* 83 (1977), 1-8.
27. Transitive Planar Graphs (with W. Imrich), *Mathematica Slovaca* 29, No. 2 (1979), 97-106.
28. Representations of Finite Partial Orderings by Binary Codes Combined with Sequential Decision Mechanisms with Applications to Digital Fault Diagnosis (with A.R. Bazelow), in: *Second International Conference on Combinatorial Mathematics (A. Gerwitz and L.V. Quintas, Eds.) ANYAA9*, 319 (1979), 188-206.
29. The Reconstruction of Line-Critical Blocks, *Ars Combinatoria* 7 (1979), 223-254.
30. Three-Regular Subgraphs of Four-Regular Graphs (with V. Chvatal, J. Sheehan, and C. Thomassen), *Journal of Graph Theory* 3 (1979), 371-386.
31. Eulersche Linien und Kreisüberdeckungen, die vorgegebene Durchgänge in den Kanten vermeiden, *Journal of Combinatorial Theory B* 29, No. 2 (1980), 145-167.
32. Three-Regular Subgraphs of Four Regular Graphs. The Case $\lambda_c = 8$ (with J. Sheehan), unpublished.
33. Even Cycles with Prescribed Chords in Planar Cubic Graphs, *Discrete Mathematics* 44 (1983), 275-280.
34. Eulerian Graphs, in: *Selected Topics in Graph Theory 2* (L. Beineke and R. Wilson, Eds.), Academic Press Inc., London (1983), 17-53.

35. A Way of Enumerating Eulerian Trails in a Connected Eulerian Graph, *Ars Combinatoria* 16B (1983), 177-193.
36. From the Bridges of Königsberg to the Chinese Postman, *Proceedings of the Second Symposium of the Southern Africa Mathematical Sciences Association* (1983), 8-32.
37. Cycle Decompositions, 2-Coverings, Removable Cycles, and the 4CD, in: *Progress in Graph Theory* (J.A. Bondy, U.S.R. Murty, Eds.), Academic Press (1984), 233-246.
38. Removable Cycles in Planar Graphs (with B. Jackson), *Journal of the London Math. Soc.* (2), 31 (1985), 193-199.
39. On the Minimum Weighted Cycle Covering Problem for Planar Graphs (with G. Meigu), *Ars Combinatoria* 20 (1985), 61-67.
40. Proof of the Strong 2-Cover Conjecture for Planar Graphs, *Journal of Combinatorial Theory B* 40, No. 2 (1986), 229-230.
41. Compatible Path-Cycle-Decompositions of Plane Graphs (with B. Jackson), *Journal of Combinatorial Theory B* 42, No. 1 (1987), 94-121.
42. Removable Edges in Cyclically 4-Edge-Connected Cubic Graphs (with L.D. Andersen and B. Jackson), *Graphs and Combinatorics* 4 (1988), 1-21.
43. Some Blood, Sweat, but no Tears in Eulerian Graph Theory, *Congressus Numer.* 63 (1988), 8-48.
44. The Prism of a 2-Connected Planar Cubic Graphs is Hamiltonian (a Proof Independent of the Four Colour Theorem), *Annals Discrete Math.* 41 (1989), 141-170.
45. Elementary Proofs of (Relatively) Recent Characterization of Eulerian Graphs, *Discrete Appl. Math.* 24 (1989), 115-119.
46. D_0 -Favouring Eulerian Trails in Digraphs (with E. Wenger), *Arch. Math. (Brno)* 25 (1989), 55-60.
47. A note concerning some conjectures on cyclically 4-edge connected 3-regular graphs (with B. Jackson), *Graph theory in memory of G. A. Dirac* (Sandbjerg, 1985), 171-177, *Ann. Discrete Math.*, 41, North-Holland, Amsterdam, 1989.
48. On the Maximum Number of Pairwise Compatible Euler Cycles (with A.J.W. Hilton and B. Jackson), *J. Graph Theory* 14 (1990), 51-63.
49. On Circuit Decomposition of Planar Eulerian Graphs (with A. Frank), *Journal of Combinatorial Theory B* 50 (1990), 245-253.
50. Compatible Euler Tours in Digraphs (with B. Jackson), in: *Cycles and Rays* (G. Hahn et al., Eds.), NATO ASI Ser. C, Kluwer Academic Publishers, Dordrecht (1990), 95-100.
51. Characterizing Directed Postman Tours (with E. Wenger), in: *Topics in Combinatorics and Graph Theory* (R. Bodendiek and R. Henn, Eds.), Physica-Verlag Heidelberg 1990, 257-262.

52. $P(D)$ -Compatible Eulerian Trails in Digraphs and a New Splitting Lemma (with M. Fulmek), in: Contemporary Methods in Graph Theory (R. Bodendiek, Ed.), B.I. Wissenschaftsverlag 1990, 291-303.
53. Eulerian Graphs and Related Topics, Part 1, Vol. 1, Annals of Discrete Mathematics 45, Elsevier Science Publishers B.V., Amsterdam-New York, 1990.
54. Eulerian Graphs and Related Topics, Part 1, Vol. 2, Annals of Discrete Mathematics 50, Elsevier Science Publishers B.V., Amsterdam-New York, 1991.
55. A Maze Search Algorithm which also Produces Eulerian Trails, in: Advances in Graph Theory (V.R. Kulli, Ed.), Vishwa International Publications 1991, 195-201.
56. Transforming Eulerian Trails (with G. Sabidussi and E. Wenger), Discrete Math. 109 (1992), 103-116.
57. A Solution to a Colouring Problem of P. Erdős (with M. Stiebitz), Discrete Math. 101 (1992), 39-48.
58. Spanning Eulerian Subgraphs, The Splitting Lemma, and Petersen's Theorem, Discrete Math. 101 (1992), 33-37.
59. Detecting Cycles through Three Fixed Vertices in a Graph (with G.J. Woeginger), Information Processing Letters 41 (1992), 29-33.
60. Generating Hamiltonian Cycles in Complete Graphs (with P. Horák and J. Širáň), Acta Math. Univ. Comenianae 62 (1993), 155-159.
61. Uniqueness of Maximal Dominating Cycles in 3-regular Graphs and of Hamiltonian Cycles in 4-regular Graphs, Journal of Graph Theory 18 (1994), 449-459.
62. The NP -Completeness of Finding A-trails in Eulerian Graphs and Finding Spanning Trees in Hypergraphs (with L.D. Andersen), Discrete Appl. Math. 59 (1995), 203-214.
63. An Eulerian Trail Traversing Specified Edges in Given Order (with M. Cai), Journal of Graph Theory 19 (1995), 137-144.
64. Equalizing Graphs, unpublished.
65. A Numbering of the Vertices of Special Networks, Discrete Math. 165/166 (1997), 263-276.
66. Some remarks on the cycle plus triangles problem (with M. Stiebitz), in: The Mathematics of Paul Erdős, vol. II, Algorithms Combin. 14, Springer, Berlin, 1997, 136-142.
67. r -regular, r -connected decompositions of complete graphs (with W.R. Johnstone and A.J.W. Hilton), J. of Comb. Designs 8; 15-21, 2000.
68. Algorithms and Outerplanar Conditions for A-Trails in Plane Eulerian Graphs (with L.D. Andersen and S. Regner), Discrete Applied Mathematics 85 (1998), 99-112.

69. Traversing Graphs: The Eulerian and Hamiltonian Theme, in *Arc Routing: Theory, Solutions, and Applications* (ed. M. Dror), pp. 19-87, Kluwer Academic Publishers, 2000.
70. Polynomial-time recognition of minimal unsatisfiable formulas with fixed clause-variable difference (with S. Szeider), *Electronic Colloquium on Computational Complexity (ECCC)*, TR-00-049, 2000.
71. Remarks on the Concept of Robust Algorithm (with S. Földes, S. Szeider), RUTCOR Research. Report RRR-26-2001, April 2001.
72. (Some of) The Many Uses of Eulerian Graphs in Graph Theory (plus Some Applications), *Discrete Mathematics* 230 (2001), 23-43.
73. A Note about the Dominating Circuit Conjecture (with M. Kochol), *Discrete Math.* 259 (2002), no. 1-3, 307-309.
74. Polynomial-time recognition of minimal unsatisfiable formulas with fixed clause-variable difference (with O. Kullmann, S. Szeider), *Theoret. Comput. Sci.* 289 (2002), no. 1, 503-516.
75. Completing Latin Squares: Critical Sets (with R.E.L. Aldred, P. Horak), *J. Combin. Des.* 10 (2002), no. 6, 419-432.
76. Bipartizing Matchings and Sabidussi's Compatibility Conjecture. *Algebraic and Topological Methods in Graph Theory (Lake Bled, 1999)*, *Discrete Math.* 244 (2002), no. 1-3, 77-82.
77. A Proof of the two-path Conjecture (with R.R. Molina, K.W. Smith, D.B. West), *Electron. J. Combin.* 9 (2002), no. 1, Note 4, 4pp (electronic).
78. 3-colorability of 4-regular Hamiltonian graphs (with G. Sabidussi), *J. Graph Theory* 42 (2003), no. 2, 125-140.
79. Colorability of Planar Graphs with Isolated Nontriangular Faces (with M.N. Ellingham, M. Kochol, E. Wenger), *Graphs Combin.* 20 (2004), no. 4, 443-446.
80. Eulerian Graphs, in *Handbook of Graph Theory. First Edition.* Eds. Jonathan L. Gross and Jay Yellen. *Discrete Mathematics and its Applications* (Boca Raton). CRC Press, Boca Raton, FL, 2004, 214-236.
81. On edge-colored Graphs Covered by Properly Colored Cycles (with S. Szeider), *Graphs Combin.* 21 (2005), no. 3, 301-306.
82. Compatible Circuit Decompositions of 4-regular Graphs (with F. Genest, B. Jackson), *J. Graph Theory* 56 (2007), no. 3, 227-240.
83. Covering Graphs with few Complete Bipartite Subgraphs (with E. Mujuni, D. Paulusma, S. Szeider), *FSTTCS 2007: Foundations of software technology and theoretical computer science*, 340-351, *Lecture Notes in Comput. Sci.*, 4855, Springer, Berlin, 2007.

84. A universal set of growth operations for fullerenes (with M. Hasheminezhad and B. D. McKay), *Chem. Phys. Lett.*, 464 (2008) 118-121.
85. Covering Graphs with few Complete Bipartite Subgraphs (with E. Mujuni, D. Paulusma, S. Szeider), *Theoret. Comput. Sci.* 410 (2009), no. 21-23, 2045-2053.
86. Hamiltonicity in Vertex Envelopes of Plane Cubic Graphs (with A.M. Hobbs, M.M. Tappuma), *Discrete Math.* 309 (2009), no. 14, 4793-4809.
87. Circuit Double Covers in Special Types of Cubic Graphs (with R. Häggkvist), *Discrete Math.* 309 (2009), no. 18, 724-728.
88. Maximum Independent Sets in 3- and 4-regular Hamiltonian graphs (with. G. Sabidussi, V.I. Sarvanov), *Discrete Math.* 310 (2010), no. 20, 2742-2749.
89. Small Maximum Independent Sets in Hamiltonian Four-Regular Graphs (with V.I. Sarvanov), *Dokl. Nats. Akad. Nauk Belarusi* 57 (2012), no. 1, 31-37.
90. Uniquely Hamiltonian Graphs of Minimum Degree Four, *J. Graph Theory* 75 (2014), no. 2, 167-177.
91. Eulerian Graphs, in *Handbook of Graph Theory. Second edition.* Eds. Jonathan L. Gross, Jay Yellen and Ping Zhang. *Discrete Mathematics and its Applications* (Boca Raton). CRC Press, Boca Raton, FL, 2014, 258-283.
92. Cycle Double Covers in Cubic Graphs Having Special Structures (with R. Häggkvist), *J. Graph Theory* 77 (2014), no. 2, 158-170.
93. Cycle Double Covers Containing Certain Circuits in Cubic Graphs Having Special Structures (with R. Häggkvist), *Discrete Math.* 338 (2015), no. 10, 1750-1754.
94. Supereulerian Graphs with Width s and s -collapsible Graphs (with Ping Li, Hao Li, Ye Chen, Hong-Jian Lai), *Discrete Appl. Math.* 200 (2016), 79-94.
95. Remembering Ralph Faudree (p.1829-1830), in *Ralph Faudree (1938-2015)*, *Discrete Math.* 339 (2016), 1828-1836.
96. Finding Uniquely Hamiltonian Graphs of Minimum Degree Three with Small Crossing Numbers, (with Benedikt Klocker, Günther R. Raidl), *Hybrid Metaheuristics: 10th International Workshop, HM 2016* (Maria J. Blesa, Christian Blum, Angelo Cangelosi, Vincenzo Cutello, Alessandro Di Nuovo, Mario Pavone, El-Ghazali Talbi, eds.), volume 9668 of LNCS, 2016, Springer, 1-16.
97. Reducing an Arbitrary Fullerene to the Dodecahedron, *Discrete Math.* 340 (2017), no. 11, 2714-2722.
98. Revisiting the Hamiltonian theme in the square of a block: the case of DT -graphs (with Gek L. Chia, Jan Ekstein), *Journal of Combinatorics*, Vol. 9, No. 1 (2018), 119-161.
99. Finding Smooth Graphs with Small Independence Numbers, (with Benedikt Klocker, Günther R. Raidl), *MOD 2017: Machine Learning, Optimization, and Big Data Third International Conference* (Giovanni Giuffrida, Giuseppe Nicosia, Panos Pardalos, Renato Umerton, eds.), volume 10710 of LNCS, (2018), Springer, 527-539.

100. Revisiting the Hamiltonian theme in the square of a block: the general case, (with Gek L. Chia), *J. Comb.* 10 (2019), no. 1, 163-201.
101. Cycle double covers via Kotzig graphs (with Roland Häggkvist and Arthur Hoffmann-Ostenhof), *J. Combin. Theory Ser. B*, 135, (2019), 212-226.
102. Cycle covers (III) – Compatible circuit decomposition and K_5 -transition minor, (with Behrooz Bagheri Gh, Cun-Quan Zhang, Zhang Zhang), *J. Combin. Theory Ser. B.*, 137 (2019), 25-54.
103. A Model for Finding Transition-Minors, (with Benedikt Klocker, Günther R. Raidl), (2018), Technical report AC-TR-18-009, Algorithms and Complexity Group, TU Wien.
104. A SAT Approach for Finding Sup-Transition-Minors, (with Benedikt Klocker, Günther R. Raidl), (2018), Technical report AC-TR-18-010, Algorithms and Complexity Group, TU Wien.
105. Hamiltonian cycles in planar cubic graphs with facial 2-factors, and a new partial solution of Barnette’s Conjecture, (with Behrooz Bagheri Gh, Tomas Feder, Carlos Subi), (2018), submitted.
106. On the algorithmic complexity of finding hamiltonian cycles in special classes of planar cubic graphs, (with Behrooz Bagheri Gh, Tomas Feder, Carlos Subi), (2018), submitted.
107. Herbert Fleischner, A Best Possible Result for the Square of a 2-Block to be Hamiltonian, (with Jan Ekstein), submitted.
108. Perfect Pseudo-Matchings in Cubic Graphs, (with Behrooz Bagheri Gh, Benedikt Klocker), (2019), preprint.
